VOX URANIÆ:

AN

ALMANACK

{ASTRONOMICAL,
ASTROLOGICAL,
METEOROLOGICAL,}

For the Year of our Lord God, 1688.

And from the World's Creation, 5637.

Being the *Bissextile*, or *Leap-Year.*

Wherein is contained

Lunations, *Monthly Observations*, *Eclipses*: Tables of the Tides, Terms, and their Returns; the rising and setting of the *Sun* and *Moon*, together with the *Moon*'s Southing and *Configurations* to the other *Planets*: with several useful Tables, and other Requisites fitting such a Subject. Accommodated and referred properly to the Meridian of the Famous City of *London*, whose *Zenith*, or Vertical Point, is distant from the Æquator Northward 51 deg. 32 min. yet it may indifferently serve any part of *England*, *Scotland* and *Ireland.*

By *DANIEL WOODWARD*,

Student in *Physick* and *Astrology*, living at the sign of the *Globe* in *Arundel-Buildings* by St. *Clements*-Church in the *Strand*, *London.*

Astrologia est aque sancta ac præstantissima Scientia, qua per Regulas bene ordinatas & comprobatas, Corpora nos Cœlestia eorumque. Motus Aspectusq; atque inde in Naturalibus Operationibus multum de futuris Eventibus præscire posse, docet cognoscere.

LONDON, Printed by *J. D.* for the Company of STATIONERS, 1688.

The Names of the Learned Judges of the Law, in His Majesty's four Grand Courts of Record, &c.

I. In the Chancery.

The Right Honourable the Baron of *Wem*, Lord Chancellor.
Sir *John Trevor*, Master of the Rolls.

II. In the King's Bench.

Sir *Robert Wright*, Lord Chief Justice.

Sir *Richard Holloway*,
Sir *John Powel*,
Sir *Richard Allebone*, } Judges.

III. In the Common-Pleas.

Sir *Edward Herbert*, Lord Chief Justice.

Sir *Thomas Street*,
Sir *Edward Lutwich*, } Judges.
Sir *Richard Milton*,

IV. In the Exchequer.

Sir *Edward Atkins*, Lord Chief Baron.

Sir *Thomas Jenner*,
Sir *Richard Heath*, } Barons.
Sir *William Powel*,

Sir *Robert Sawyer*, Attourney } General.
Sir *Thomas Powis*, Sollicitor }

Stand there Learn'd Judges, and Lord may they stand!
The Law is just; the Vices of the Land
Call for Correction: God's Vicegerent here,
And his good Laws, make evil Actors fear;
Dispens'd with Prudence: for Θέμις doth stand
Holding the equal Ballance in her hand.
A Deo Rex, à Rege Lex.

Note, in the Column of the *Sun*'s rising and setting, as many Minutes as he rises after the hour in the Morning, so many Minutes he sets before the hour noted at Night.

By this Table, and the help of Addition, you may compleat the Interest of any Sum whatsoever, from a day to a year, &c. And for the greater exactness, the Peny is divided into 100 parts, so that 25 Parts are a Farthing, &c. This Table is so easy (the Premises being well considered) it needs no Example.

Pecunia obedient omnia

Rouze up my Muſe, but Loyal Parts diſplay;
Long haſt thou hop'd to ſee this happy day.
A Loyal Heart is ſuch, and ſuch alone,
That God with Love and Pity looks upon.
Such he affects, therefore (O Lord) to thee
Such let my Heart, and ſuch my Spirit be.

The Royal Scepter Kingly Power implies,
The Crown-Imperial, Glory signifies;
And by these joyn'd in one we understand
A King, that is an Honour to his Land.
A Kingdom is not always eminent
By having Confines of a large extent.

29	7 28	10 34		6 20 6

For Poverty and Barbarous are found,
Ev'n in those large Dominions to abound;
Nor is it Wealth which gets a glorious Name,
For then those Lands would spread the widest Fame,
From whence we fetch the Gold and Silver Oar,
And where we gather Pearls upon the Shoar.

April hath XXX Days.

For proud of their own Pow'r they sometimes grow,
And quarrel 'till themselves they overthrow;
Nor do the chiefest Glories of a Land,
In many Cities, or much People stand:
For then those Kingdoms more renowned were,
In which unchristian Kings and Tyrants are.

July hath XXXI Days.

What may the reason be so many wed,
And miss the Blessings of a joyful Bed;
But those ungodly and improper Ends,
For which this Age most Marriages intends.
Some love plump Flesh, and those as kind will be
To any Gamesome Wanton as to thee.

Now bright *Phabus* from the hath warm'd our Northern Hemisphere, retires again to the Southern. The Earth yields the Husband-man the Fruit of his labour, and returns his Expences with Increase. If the Month proves dry, warm, and free from high VViads, rejoyceth the Country-mans Heart. Lay on your Soil, as well on Barley as VVheat-Land. Put your Ewes and Cows you like not, to fatting. Carry home your VVood, or other Fewel, before Winter. Make Syder of Summer-Fruits. Pull up Suckers from the Roots of Trees. Plant Saffron; set slips of Gilliflowers; Gather Seeds of Flowers and Herbs, also Onions, Garlick, &c. Prop up the Hop-poles the wind hath blown down: at the end Gather Hops, and take Bees, unless the weather invites you to stay till the middle of the next month: Destroy Wasps, secure your Bees from Robbers.

September hath XXX Days.

This Wealth is that ſweet Beauty which prefers
So many to their Executioners:
This is that rare Perfection, for whoſe ſake
The Politician doth his Marriage make:
Yea, moſt of thoſe whom you ſhall married find,
Were cozen'd (or did cozen) in this kind.

November hath XXX Days.

Now having by Experience understood
His words, who said his Trouble did him good;
Till from the Straw the Flail the Corn doth beat,
And till the Chaff be be purged from the Wheat;
Yet till the Mill the Grains in pieces tear
The Richness of the Flour will not appear.

Here follows the Use of the foregoing Tide-Table, viz. how it is to be used with the Moons *Southing, whereby it may be made plain, especially to all those whose Imployments chiefly depends on the* SEAS.

SUppose that you desire to know what time it will be *High-Water* at *Bristol Ianuary* 11*th.* 1688. (it being already performed on the Right-hand Page and third Column of the *Kalender* for every day this Year at *London*) I turn to the Right-hand Page of *Ianuary*, and second Column (for through every Month in that Page and second Column, the Moon's Southing is inserted) where against the 11*th.* day of *Ianuary*, I find 2 hours 34 min. M. the time of the Moons Southing in the Morning: Then in the Table on the back-side of this Leaf against *Bristol*, &c. 6 hours 45 min. which (as the Title directs) being added to 2 hours 34 min. (the Moons Southing) makes 9 hours 19 min. So that I conclude that *High-Water* at *Bristol* 19 min. past 9 of the Clock in the Morning, *Ianuary* the 11*th.* 1688. *Et sic in aliis.* But if the Sum of the two former Numbers had exceeded 12 hours, you must have subducted 12 hours therefrom, and the residue had been the true time desired.

Where Note, That the Tide floweth one Point of the Compass more at the Spring-Tides (which are the New and Full Moons) than at the Neap-Tides (which are the first and second Quarters.) As also Land-Floods and boisterous Winds may cause some Variation, but this is the exactest Rule that can be given, in regard the Moons Southing is Calculated with Latitude.

To gain the Hour and Minute of the Night by a *Sun-Dyal*, observe this Order, When the Moon shines, see how many hours and minutes the Shadow wants of the Line 12, which subducted from the Moons Southing, leaves the time of the Night; but if the Shadow falls past the 12*th.* Line, add the hour and minute to the hour and minute of the Moons Southing, the Sum is the Hour and Minute of the Night desired. *This may prove Delightful.*

Time, *yea, and* Tides, *pass swift away,*
And will for no Man's Leasure stay.

An easie and useful Table, shewing how many Years Purchase a Lease, or Annuity, to endure for any term of Years under 33, is worth presently at Interest upon Interest, at 6 in the Hundred: and shewing plainly how to discount any Lease in being, and the true value of the Reversion after any number of Years.

Years of a Lease.	Years.	Months.	Dec par.
1	0	11	0
2	1	9	9
3	2	8	1
4	3	5	9
5	4	2	5
6	4	11	0
7	5	7	0
8	6	2	5
9	6	9	6
10	7	4	3
11	7	10	7
12	8	4	6
13	8	10	3
14	9	3	6
15	9	8	5
16	10	1	3

The Explanation of this Table.

THe first Column towards the left hand, shews the Years of a Lease or Annuity, & right against each Year, are the Years, Months, and Decimal parts of a Month's Purchase that such a Lease is worth.

As for Example.

Suppose a Lease or Annuity to continue 10 Years, and you would know how many Years Purchase it is worth in present Money; look in the Table for 10 Years of a Lease to the left hand, and against the same you will find 7, 4, 3. which shews that your Lease of 10 Years, is worth 7 Years 4 Months and 3 10*th* parts of a Months *purchase*.

Years of a Lease.	Years.	Months.	Dec par.

Again, if you were to take or buy the Reversion of any Lease or Annuity, work thus. Suppose the Lease to be thirty Years in all, you shall find in the second Table, and right hand, against 30, 13 Years, 9 Months, and 2 tenth parts of a Months Purchase; this it were worth were it in present Possession. But suppose there be a Lease of 5 Years (more or less) before you Commence, look in the Table against 5 Years, and there you shall find 4 Years, 2 Months, and 5 tenth Parts, (or half a Months Purchase); substract this out of the Sum against 30, which is 13, 0, 2 less by 4, 2 5. The Residue after Substraction is 9 Years, 6 Months, 7 tenth parts of a Month; and so much is the Reversion after 5 Years worth the Remainder of 30.

The *Exchequer* Opens 8 days before any *Term* begins except *Trinity Term*, before which it only opens 4 days. Where Note the first and last days of every *Term*, are the first and last days of Appearance. The Glorious Planet *Venus*, is our Morning Star from the beginning of the Year till *Aug.* 24. at which time she conjoyns with the *Sun*, and becomes our Evening Star till the end of the Year.

Dormit aliquando lex, Moritur Nunquam.

Of the ECLIPSES *this present Year.*

I. THe Glorious Luminaries, or Lights of Heaven, will 4 times be depriv'd of Light, *viz.* There will be two *Eclipses* of the *Sun*, and two of the *Moon*, as followeth.

II. The first *Eclipse* will be of the *Moon* the 5 of *April*, about 6 of the Clock in the Evening, in the 26 Degree of the Æquinoctial Sign *Libra*. This *Eclipse* will be great, yet but little visible to the Inhabitants of *England*, because the *Moon* at the middle time of the Celebration, will be beneath our Horizon, but its effects will Operate in the Kingdom 'tis Celebrated, in the Sign opposite to *Aries*, the Kingdoms Ascendent. As 'tis Celebrated in *Libra*, (which is a Sign of the *Aiery Trigon* or *Triplicity*,) it denotes Stormy tempestuous Weather, Pestilential Diseases, Abortive Births, *&c.* And produces abundance of Locusts, Catter-pillars, and other Vermine, to destroy the Product or Fruits of the Earth.

III. The second *Eclipse* will be of the *Sun*, the 20 of *April*, about 1 of the Clock in the morning, in the 11 Degree of the Sign *Taurus*, the Ascendent of *Ireland*, *Poland*, *Russia*, &c. But this *Eclipse* cannot be seen of us in *England*, because the *Eclipsed* Luminary will be under our Earthly Globe, for 'twill be Celebrated almost in the very Meridian of our *Antipodes*. *Taurus* is a Sign of the Earthy Triplicity, and an *Eclipse* happening therein, is usually the Πρόδρομος or *Præcursor* of destruction to the Fruits of the Earth, scarcity of Corn, Famine, and danger of a raging Pestilence, extream Colds, Frost, thick and foggy Weather, Unwholsome Air, Consumptions, and such Diseases as proceed from Melancholly.

IV. The third *Eclipse* will be of the *Moon*, the 29 of *September*, about 10 of the Clock in the morning, in the 17 Degree of the Celestial Sign *Aries*, the Ascendent of *England*, &c. But this *Deliquium* also, will be invisible in our Hemisphere; for when 'tis Celebrated the *Sun* will be many Hours above the Horizon. As it happens in the Fiery Trigon it foreshews fiery Exhalations and Meteors in the Air,

Thunder, Lightning and Corruscations, Droughts, Destruction of 4 footed Creatures, Thefts, Murther, Burning and Pestilential Fevers, Burning of Houses, *&c.*

V. The fourth and last *Eclipse* will be of the *Sun*, the 14 of *October*, about 7 of the Clock in the morning, in the 2 Degree of the Cælestial *Scorpion*. The latter part of this *Eclipse* may be seen in *England*, but the beginning will be over before the *Sun* will be above our Eastern Horizon. This *Eclipse* is Celebrated in the Watery Trigon, and denotes Storms, Troubles, and Tempests at Sea, Cold, Cloudy, Misty Foggy Weather; Inundations and overflowing of the Sea-Banks, and the Destruction of Fish and Water-Fowl, with Mortality among the Common People. *In Luminarium Eclipsibus quærenda est qualitas eventus, Quantitas, Locus, & Tempus.* But being not permitted to Publish any large Astrological Prognostications, I'le omit all further Scrutiny, and present you with the Calculation of the *Vernal Solar* Ingress.

I. From the *Doctrine* of *Nativities*.

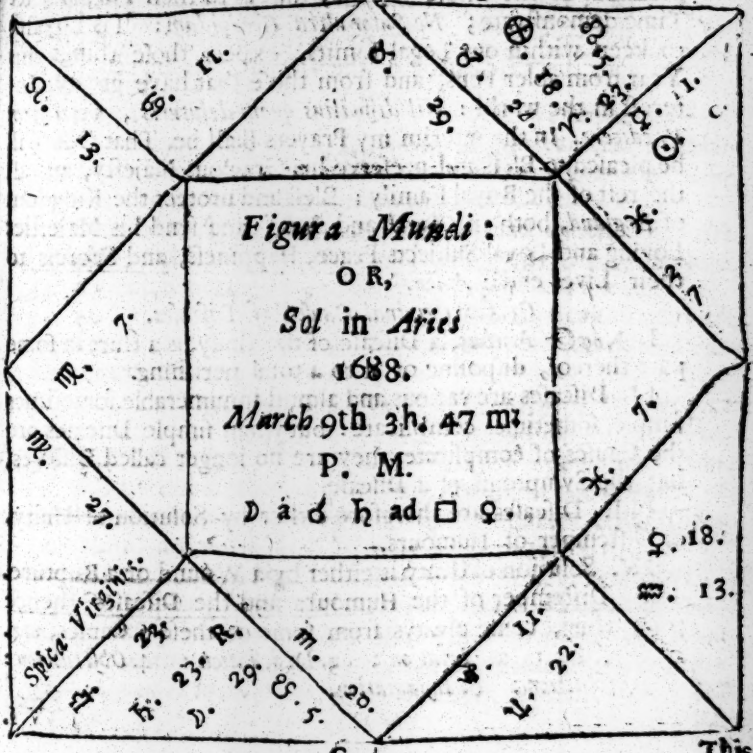
The Position of Heaven at the *Suns* Ingress into *Aries.*



This

This is the true Position of Heaven at the time given by the *Caroline Tables*, in which Scheme you may behold, 1. That 4 of the Cælestial Bodies are under the Earth. 2. That 5 of the 7 Wanderers are posited in abject Quarters of Heaven. 3. That the two Superiours *Saturn* and *Jupiter* (whereof *Saturn* is Retrograde) are in Quartile to each other. 4. That the *Moon* is in *Via Cumbusta*, near *Cauda Draconis*, seperating from the Body of *Saturn*, and applying to the *Quartile* of *Venus*. 5. That *Mars* and *Venus* are within Orbs of a *Quartile*. 6. That the *Sun* and *Mercury* apply to the *Opposition* of *Saturn* and *Quartile* of *Jupiter*. 7. That *Mars* is but just seperated from the *Trine* of *Jupiter*. 8. That *Venus* applies to the *Trine* of *Saturn*. These are the chief Configurations of the whole Scheme, but as to their Portents let Time demonstrate; *Ne Sutor ultra Credpidam*: 'Tis Loyalty to keep within our Legal Limits, expect those things this Year from abler Pens, and from those that have greater Interest in the world: *Nil difficilius quam defuturis, veritatem Prædicere.* In the interim my Prayers shall be, That God will be pleased to Bless and preserve his Gracious Majesty, and all the rest of the Royal Family: Bless and protect the Kingdom of *England*, both in *Church* and *State*, and send his Majesties Loving and Loyal Subjects Peace, Happiness, and Success to their Lives end; *Amen.*

Of the Original Causes of Diseases.

I. Νόσος *Morbus*, a Disease of the Body, is a Hurt in some part thereof, disposing of it to a total perishing.

II. Diseases are various, and almost innumerable, sometimes simple, sometimes complicate: but when simple Diseases are the Causes of complicate, they are no longer called Diseases, but the Symptoms of a Disease.

III. Diseases are therefore either by Solution of Unity, or Distemper of Humours.

IV. Solution of Unity is either by a Wound or a Rupture.

V. Distemper of the Humours and the Diseases thence proceeding, come always from some of these 6 Causes, *viz.* 1. *Crudities*: 2. *Infation*: 3. *Distillation*: 4. *Obstruction*: 5. *Putrefaction*: 6. *Inflamation.*

VI.

VI. *Crudities* proceed from Nutriment not sufficiently concocted, to wit, either the Chyle, or the Blood, which comes, first from the Quality of the Food; secondly, from Quantity; thirdly, for want of Exercise. *First in respect of Quality, when 'tis taken too raw, Flegmatick, Unwholsome, or that which the Concoctive Faculty cannot overcome. Secondly in Quantity, when more is received than the Concoctive Faculty can alter and digest; from whence undigested Humours, like some strange matter, burden the Body. Thirdly, want of Exercise, which suffocates the natural heat that it cannot stoutly perform its Office in the Concoction of Food.*

VII. *Crudities* in the Stomach cause loathing of Food, and the *Green Sickness. For so long as the first Food is not digested, there can be no Appetite to any more: Again, according to the sickness the Crudity is changed to, so the Stomach desires, as to eat Earth, Chalk, Coals, &c. for every like desires its like.*

VIII. *Viscous Crudities* lodging in the Ventricle or Guts, being warmed, are vivified, and turns into Worms, which gnawing the Bowels, stir up evil Vapours: from hence also comes Phantasies which disturb the Brain.

IX. Lastly, *Crudities* under the Skin, to wit, in the Flesh and Blood, beget paleness; and gathered together and putrified, it produces Aposthumes, Scabs, Itch, Ulcers, *&c.*

X. *Inflations* are gross Vapours exhaling from the Crudities that are gathered together, thereby stretching and extending the parts it afflicts.

XI. *Inflations* or Wind, causeth Yexing or Belching in the Ventricle; Panting in the Heart, Giddiness in the Head, Laziness & stretching in the whole Body, if it be without Pain.

XII. But *Inflations* with Pain, causeth the Cholick or Ach in the Bowels, and Prickings in the Muscles, either sharp or blunt, according as it is more gross or subtil.

XIII. *Distillation* is caused from the Condensation of Crude Vapours into Rheum. *For Crude Vapours in abundance filling the Head, and by reason of grossness and want of passage the ordinary way; through the Coldness of the Brain they become Rheum, flowing by the Eyes, Nostrils, Ears, and Throat, thereby causing many Diseases.*

XIV.

XIV. *Distillation* at the Nose, cause the *Pose*; into the Jaws, a *Catarrh*; into the Almonds, the *Quinsey*; into the Lungs, the *Asthma*, and difficulty of Breathing, which if it be salt and sharp, Ulcerating the Lungs, causes the Cough, and if it be long and often, it fills the Lungs with Apostumes, thereby causing a Consumption: *For the Ulcerated Lungs not performing their Office as they ought, the vital Spirit becomes hotter than it should; thereby feeding upon the Flesh and Blood, so consuming (at length) the very Liver it self, the Fountain of Radical Moisture, whence for want of a daily Generation of Blood, immediately follows a Consumption of the whole Body.*

XV. *Distillations* being much and gross, flowing down the back, cause the *Palsie*; by hindring the Animal Spirit, that it cannot be distributed by the Nerves, spring from the *Spina dorsi*; Filling the Nerves of the Muscles only; it becomes a *Spasma*, or Convulsion: But if it flow subtil and penetrate the Nerves, it manifests it self in the extremities of the Members in sharp pains called the GOUT; which in the Feet, are called in Greek Ποδάγρα *Podagra*; in the Knees, *Gonagra*; in the Hips, *Sciatica*; in the Hands, *Chiragra*; generally in many Joynts, *Arthritica*; Running *Rheumatismus*.

XVI. Lastly, *Distillations* staying in the Head, (being subtil and thin) cause the Head-ach: When too Raw and Phlegmatick, the *Lethargy*; Salt and Cholerick, the *Phrensey*; gross and mixt with Melancholly, the *Epilepsy*, or *Falling-sickness*: But gross and Phlegmatick, filling at once all the Vessels of the Brain, cause the *Apoplexy*, which is a privation of all Sense and Motion, whereby the vital Spirits and heat in the Heart, are soon extinguished.

XVII. OBSTRUCTION is a stoppage of the Inwards by thickned Flegm, so that they cannot execute their Office.

XVIII. When the Intrails are Obstructed that they cannot void, it is the wring of the Guts: When the Liver, the *Dropsie*: *For the Chylus being not turned into Blood, flows through the Veins and Members, and cannot be turned into Flesh.*

XIX. When the Gall is Obstructed, it causeth the *Yellow Jaundice*; when the Spleen, the *Black Jaundice*: *For in the one Choler, in the other Melancholly, difuse themselves through the whole Mass of Blood.*

XX.

XX. Lastly, when the Pipes of the Urine or Bladder, are *stopped*, it is by reason of Gravel or the Stone, which in Obstructions, by reason of their sharpness, cause extream pain.

XXI. PUTREFACTION is the Corruption of some Humour in the Body, to wit, of Phlegm, Choller, or Melancholly, causing *Febris Putrida*, a rotten Feaver, or Ulcer.

XXII. *Putrefaction* within the Vessels, if it be of all the Humours equally, it causeth a Feaver called *Synochus Putrida*; but if of one Humour only, a continual Feaver; as of Choller, a continual Terrian or a Burning Feaver; of Flegm, a continual Quotidian; of Melancholly, a continual Quartan.

XXIII. *Putrefaction* without the Vessels, causeth an intermitting Feaver: Of Phlegm, an intermitting Quotidian: Of Choller, an intermitting Tertian: Of Melancholly, an intermitting Quartan.

XXIV. *Putrefaction* in the Extream Parts, in Apostlumes, or Tumours, causeth Ulcers.

XXV. INFLAMATION is an over-heating of the Vital Spirit, or of the Blood, by reason of too much motion either of Body or Mind, or else by Obstruction. *For Motion will heat even to Fring; and Obstruction doth by an Antiperistasis exasperate the Heat included, so that at length it breaks out violently; for wet Hay laid together (for want of Transpiration soon inkindles.*

XXVI. When the Blood is kindled within the Vessels, it causes a Feaver, but when under the Skin, the *Ἐρυσίπελας, Ignis Sacer*, or St. *Anthony*'s-Fire; which is known by the great Inflamation and Pain, but it seldom comes to ripeness.

XXVII. The Spirits enflamed, cause *Ephemera*, or *Diaria Simpliciter*, an one day Feaver; or else *Diaria plurium dierum*, called *Synochus non Putrida*, enduring 3 or 4 days.

XXVIII. *Inflamation* in the Fleshy Parts, causeth *Hectica Febris*, or *Marasmus*. *From hence we learn, First, Putrid Feavers burn the Humours: Secondly, Ephemera burns the Spirits or Blood: Thirdly, Hectick Feavers burn the Solid Parts; for Hectick Feavers fasten on the Bones and Membranes, eating and consuming them with an Unnatural heat, by degrees, and almost insensibly, till it cause Death, in manner of a Consumption; but the Ephemera feeding upon the Spirits only, scarcely endures above one*

or

or two days, till the peccant matter be consumed by the Spirit it self, or the Spirit be overcome by it; hence Health or Death follows within 3 or 4 days; and of this sort also are all Malign and Pestilential Feavers. And the Putrid Feaver seizes the Blood and Humours, by which the whole Body grows hot and inflamed. Where note, if the Humours putrifie within their Vessels, especially near the Heart, as the Liver, or the Gall, the Spirits are kindled against them, and ceases not till they expell or are expelled, and therefore it is often Mortal, and is called the Continual Feaver: But if the Humours Putrifie out of their Vessels in the Veins and Members, it is an intermitting Feaver, for the Spirits that heat, oppose that Putridness at certain times; but the contest (being far from the Heart) ended, the Spirits return home; so that if the Putrifying Humour be Phlegm, it renews the contest the next day, hence the Quotidian Feaver; if Yellow Choller, then every third day, hence Tertians; if black Choller, the fourth day, hence Quartans: The inequality proceeds from the Humour, for Pituita or Phlegm, as it is speedily dissipated, so it as speedily recollects it self, making a new contest with the Spirits. Yellow Choller (which is hot of it self) opposing the Spirits, causeth a longer contest, and is commonly called a Tertian or Burning Feaver; but Bilis Ara, burnt Choller or Melancholly, being a Gross, Cold, Dreggy, Sluggish, and obstinate Humour, being overcome, cannot so easily return, viz. till the 4th day, by reason it is long of recruiting it self; and hence Quartans become stubborn and tedious.

Two Astrological Experiments.

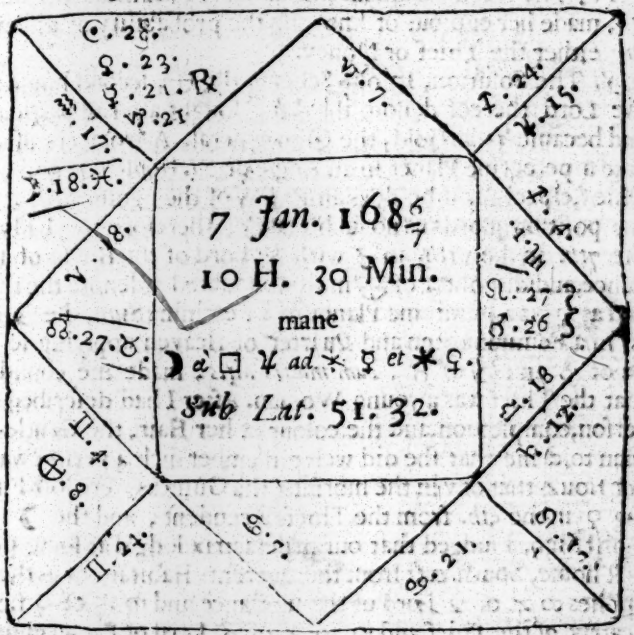
I. OUR Interrogatrix is a Gentlewoman that lives not far from *Soho-Square*, but was Born the 2 of *May*, *Anno* 1652. in *Fleet-street*, and was liberally Educated in this Honourable City, till the 20*th*. Year of her Age. I have had the Honour of being acquainted with this Gentlewoman at least 7 or 8 Years, and for some Years before she Married, was often Sick and indispos'd, and was pleas'd to accept of my Medical Præscriptions; but the occasion of her coming to me this time, was not in respect of her Health only, but also to be Astrologically satisfied of another thing, that made her mind uneasie.

II. The first Question thus; She having been ill 4 or 5 Months; was desirous to know the occasion of that illness; there-

therefore one of her Demands was to know, Whether she was with-Child or not, and if with-Child, whether Male or Female.

III. The Solution, finding the fæcund Sign *Cancer* upon the Cusp of the 5th. and the ☽ Lady thereof in the fertile Sign ♓ ſeparating from the □ of ♃, and applying to the ✶s of ☿, ♀ and the ☉, and ♂ Lord of Aſcendent is ſtrong in the

The Figura Cœli *when the* Queſtions *were propoſed.*



fertile Sign ♏ in ✶ alſo to the ☉, ♀ and ☿ the ☽ likewiſe Lady of the 5th. applies to the △ of ♂ Lord of the Aſcendent, together with the interception of ♋ in the Eaſt Angle, and ♃ (a general ſignificator of Children) haveing the Dignities of Exaltation in the 5th. and projecting his benevolent beams to the Sign aſcending, are ſufficient Teſtimonies in Aſtrology of her being conceiv'd; wherefore I told her that 'twas my Opi-

nion

nion she was with-Child, and that of a Girl (because the Major arguments so denote) which proved exactly true; but withal, I inform'd her that I suppos'd the child would not live long after its birth, because the ☽ is posited in the 12*th.* (the 8*th.* from the 5*th.*) and in □ to ♅ Lord thereof and of the 8*th.* of the Figure this also was very true, for the Child liv'd but five days after 'twas Born.

IV. The second demand was about 11 Guineas lost out of 75, made her curious of knowing the probability of discovering either the Thief or Money.

V. The Solution, In our Scheme the ⊕, second house and the Lord thereof denote the thing sought after in particular, and because 'twas Gold, the ☉ in general. Astrologers usually take a peregrine Planet in an Angle or 2*d.* House to signifie the Thief, especially if he does afflict any of the significators, but our position affords us no such Planet; therefore ♀ Lady of the 7*th.* in the 11*th.* in ♂ with ☿ Lord of the House of substance, and dispositor of ⊕ must undoubtedly denote the theif, and as ♀ is a Feminine Planet in a Feminine Sign, the ☽ also is in a Feminine Sign and Quarter of Heaven applying to the ✶ of ♉ and △ of ♂, *cum multis aliis*, made me confident that the Thief was a young Woman. After I had described her person, complexion, and the colour of her Hair, the Gentlewoman told me that she did well remember such a person was at her House that day in the morning the Guineas were lost. Finding ♀ in the 5*th.* from the Thiefs ascendent, and the ☽ in a moist Sign, I judged that our malefactrix lodg'd at some publick house, South-east from the Querents Habitation, as the ☽ applies to ✶ of ☿ Lord of the substance, and to ✶ of ♀ significatrix of the Thief, and ♀ to ✶ of ♂ Lord of the ascendent, I encourag'd the Gentlewoman to be vigilant in seeking, & told her that if she went about her business with courage, she would not only find the Thief, but also have all or the major part of her Money again within a day or two at most. This gave ample satisfaction, and proved true in every particular.

Natu & arbitiro Dei omnia reguntur.

For Conclusion, *That as I am an Astrological Professor, and a Practitioner in its several Parts; so I dare undertake to teach the same to any that desire to understand it: To wit,* The

I. The *Horary Part*, the method of resolving all manner of *Questions* belonging to the Body or Estate of Man: As life, whether long or short? rich or poor? what part of the life is like to be most prosperous? or any other legal demand, whose solution is contain'd within the Perimeter of this sublime Science.

II. The *Genethliacal Part*, the manner of *Rectifying*, *Directing*, and passing judgment on *Nativities*, wherein is naturally foreseen the most remarkable accidents that may happen during the race of Mans life. Also how to *Calculate* the Longitude, Latitude, Declination and Ascension of the *Planets*.

III. The *Judgment* of the *World*, how to *Calculate* and *Judge* an *Annual Revolution*, *Compose Monthly Observations*, the *Calculation of Eclipses*, past or to come, and to give the signification of the same, with the Portents of *Comets*, eminent Configurations of the *Cœlestial Bodies*, Rising, Southing, and Setting of the *Moon*, or any of the *Wandring Stars*, as also the use of the *Globes*.

Nil tam difficile est, quod non solertia vincat.

IV. Lastly, As I am a Professor of *Astrology*, so I am of *Physick*, and have always Medicaments prepared and fitted for the Cure of most Diseases Cureable, incident to the Bodies of *Men*, *Women* & *Children*, proceeding from what cause, nature, or quality soever. The Vertues of some of my Medicines follow.

I. My *Balsamick Pills*, which are infallibly good in the Cure of the *SCURVY*, *Dropsie*, *Head-aches*, *Melancholly-Sleepy-Evil*, *Giddiness in the Head*, *Dullness of Hearing*, *Dimness of Sight*, *Madness*, *Jaundies*, *Agues*, *sore Eyes*, *Fevers*, *stinking Breath*, *want of Appetite*, *Green-sickness*, *Sciatica*, *Pains in the Stomach*, *Liver*, *Spleen*, *Gripings in the Breast*, *Bowels or Joynts*, open *Obstructions* of both *Reins* and *Bladder*, Cure *Barrenness*, help *fits* of the *Mother*, quicken the Senses, clear the Sight, add a good colour to the Face, and make the Body able to withstand *Diseases*, purifie, cleanse and sweeten the *Blood*; resist putrefaction and corruption of the *Humours* and *Diseases* thence proceeding afflicting the *Head*, *Liver*, *Spleen*, *Gall*, *Stomach*, *Reins*, *Bladder*, *Joynts*. In a word, these *Pills* are a cheap, safe, easie and *approved help* for most Diseases happening to Man, Woman or Child, as Hundreds can testifie;

They

They are also excellent to Purge the Body after Sickness or excessive Drinking, or before letting of Blood, and for such to take, that drink either *Tunbridge*, *Epsom*, *Islington*, or other Waters. They have oftentimes Cured in a Month, three Weeks, yea, in fourteen days time, and sometimes in less, very deplorable Diseases: Cure Shortness of Breath, Vomiting, Stoppage of the Stomach, the Scurvy, Dropsie, Jaundice, Shortness of Breath, and Agues, sometimes when the hope of recovery has been past. *Price of the whole Box* 3s. *Of the half Box* 1s. 6d. *With Directions*

II. My *Elixir Salutis*, has been experienced many years, an excellent inoffensive Cordial Drink, and so Analogous to the Human Frame, that it effects its Operation even as Nature is dispos'd for Action. And for those Persons that cannot take Pills, I Publish this Elixir. It has been given to Young and Old, and prov'd it self successful in the Cure of the following Distempers, to wit, The Cholick, Griping in the Guts, Scurvy, Shortness of Breath, Coughs, Agues, Surfeits, Dropsie, bad Digestions, Vapours from the Spleen, *&c.* Besides, this Cordial revives Drooping, Melancholly Spirits, removes pains from the Heart and Stomach, Wind and Crudities, causes a good Appetite, and cleanses the Body after Fits of Sickness, and drinking of the Waters, for it leaves the Body in a healthful settled Condition: 'Twill retain its Vertues several years: 'Tis Sealed up in half pint Bottles, the Price of each 2s. 6d. with Printed Directions of its Use, to be deliver'd to any Messenger.

III. My *Oyntment* for the *Worms*, which destroys all sorts of them in Young or Old. Physitians are of opinion, that these Vermine shorten more peoples Lives, than the Sword or Plague; for they cause many Diseases, as the Vertigo Megrim, Rickets, Falling sickness, Consumptions Feavers, Convulsion fits, *&c.* Many are afflicted with the *worms* and yet not know of it, some are tormented with them from the Cradle to the Grave. Besides destroying of the Worms, the Unguent opens Obstructions of the Stomach, causes Appetite, strengthens the Brain, & hath been instrumental (*sub Deo*) to preserve thousands. You may have of it from 1s. worth, to what quantity you please, with Directions in Print of its Use.

IV. My *Pills*, only prepared for the French Disease, for which, & the Running of the Reins, there is nothing more safe and sure, if the Patient takes them with my Diet Drink, first the Pills then the Diet Drink, (with other Venerial Antidotes, as occasion requires) by which means I have Cured as many as any Man in my time, and for as small Charge. Price 2s. the Box. Yet the Pills may be taken very safely, & the other things omitted, if you observe the Printed Directions.

My hours are from 10 *in the Morning, till* 9 *at Night.*

From the Globe in Arundel *Buildings, in the* Strand, June 10. 1687.

D. WORLIDGE D.

FINIS.
